DVD Training Program

- **"See" ESD events as they happen in real time; view oscilloscope pictures on DVD**
Powerful method to convince workers that ESD events easily occur
- **Series of experiments demonstrates personal grounding**
Shows that wrist strap grounding removes charges and eliminates ESD events
- **23 minutes of instructional material featuring Ted Dangelmayer, a past president of the ESD Association**
Correct and updated information clearly presented
- **Material designed for live presentation with audience interaction**
Consider using as part of ANSI/ESD S20.20 required Training Plan

Chapters

- Introduction
- Controlling HBM Damage
- Safe & Unsafe Work Surfaces
- Using Totes
- The Charged Device Model
- Ionizers and Summary

You will actually "see" ESD events as they happen in real time. Believe your own eyes, and apply this knowledge to control potentially destructive static in your workplace! The training material addresses the needs of engineers and technicians in qualitatively and quantitatively understanding ESD threats to electronic components and assemblies.
